

2022 SIPA Building Excellence Awards

Official Entry Form

APPLICATION DEADLINE: *January 12, 2022*

The Structural Insulated Panel Association (SIPA) is hosting the twentieth annual Building Excellence Awards to recognize association members that build exemplary projects using structural insulated panels (SIPs). The competition allows SIPA members to showcase their best work while demonstrating the design flexibility, sustainability and energy efficiency possible with SIP construction.

SelectSIPs
EXPO  **2022**
A Better Way to Build

Feb 28-Mar 2 / ORLANDO, FL

Winning entries will be showcased at the 2021 SIPA Annual Meeting and SelectSIPs EXPO.

**Structural Insulated
Panel Association**

Homes and commercial buildings completed between January 1, 2021 and December 31, 2021 are eligible.

Award Categories:

- High Performance (*any size or use category - judged only on special High Performance features or certifications*)
- Single Family 'Small House' under 900 sq. ft.
- Single Family Homes over 3,000 sq. ft.
- Single Family Homes under 3,000 sq. ft.
- Multifamily
- Agricultural
- Commercial/Industrial/Institutional Buildings under 10,000 sq. ft.
- Commercial/Industrial/Institutional Buildings over 10,000 sq. ft.
- Renovations (*residential or commercial, includes additions and retrofit insulated panels*)
- Affordable Housing (*excludes multifamily, home ownership cost must be at or below 30% of median income for location*)

Who is Eligible?

- The submitting company must be a current SIPA member in good standing
- Structural insulated panels must be used on a minimum of 50% of the building envelope, determined by square footage of exterior walls and roof
- The SIPs used on the project must be provided by a SIPA member manufacturer
- Installers, designers or other parties involved in the project who are not SIPA members will not be recognized in awards materials. However, builders or architects may apply for membership with their entry, but must be full members in good standing prior to the closing date for the entry to receive recognition.
- Project must be completed between January 1, 2021 and December 31, 2021

Winning Entries

- One winner will be chosen from each category. From the category winners, an Overall Competition Winner and a Runner-Up will be named.
- Judges may hand out Honorable Mentions at their discretion
- Winners will be recognized at the 2022 SIPA SelectSIPs EXPO (Annual Meeting) in Orlando, Florida, February 28 - March 2, 2022.
- SIPA will promote the winning entries on the SIPA website and issue a press release to outside media

Guidelines

- Member companies may make multiple entries, but a separate entry form must be completed for each entry (except for same project also submitted to High Performance category)
- SIPA has the right to use the photos to promote SIPs to the construction industry. All entries will be displayed on the SIPA website.
- The deadline for entries is January 12, 2022. All entries must be received at the SIPA office on or before that date.

The following information and documentation is REQUIRED. Entries without the required items will not be considered.

- Completed and signed application
- A minimum of two photos showing different views of the completed project
- Photographs must be submitted in digital form and be at least 2400 x 3000 pixels, or 8" x 10" at 300 dpi
- Residential projects are encouraged to have a HERS Index calculated by a RESNET certified home energy rater. High Performance category projects must present a HERS Index with blower door data. Commercial High Performance projects must provide other documentation of energy efficiency.

Additional documentation is not required but is highly recommended to give the judges a clear picture of the project's overall design, sustainability, systems integration, and energy efficiency.

- Additional photos showing the construction process and SIP installation
- Documentation of energy efficiency, such as a HERS report, blower door test results, utility bill data, or infrared thermography
- A thorough description of energy-efficient technologies other than SIPs, as well as other innovative or sustainable features
- Comments from the building owners regarding their satisfaction with the building
- A floor plan of the project. A single page line drawing no larger than 17" x 22" in size is sufficient. Please do not send full blueprints.

Judging Criteria

Each entry will be judged on the following criteria:

- Design and structural engineering innovation
- Creative use of SIP construction
- Environmental sustainability

New High Performance Category criteria:

- Projects can compete both here and in specific building type category
- Only features pertaining to eco-efficiency, health, resilience, and renewable energy are considered here
- Energy efficiency (quantified by HERS Index, blower door and other data)

PROJECT INFORMATION

Project Name: Holtmann Residence

Address: 4510 Highway 73

City: Deerfield

State: WI

Zip: 53531

Date completed: July 19, 2021

Total cost of project (exclusive of land): 1,200,000

Dimensions of building (all floors of multi-story building):

House - 5,600 + porch 484.

Garage - 1,416 1st floor; 1,416 LL

Asking price/purchase price (Affordable Housing only):

n/a

Total sq. ft. of conditioned space:

5,600

BUILT BY (if different than applicant)

Please answer each question with as much detail as possible to help in the judging process.

Attach additional sheets if necessary.

Describe the end use of the building:

Single family residential home

How did SIP construction help you get this job?

Blower door test on our previous homes. The quietness and healthiness benefits of having a SIPS home.

SIP wall thickness and core material: R26

SIP roof thickness and core material: No roof panels on this project

Describe the benefits of using SIPs on this project. Did SIPs help save time, labor, construction costs, or energy?

10' walls.

The time frame or speed that we can install SIPs was very important to the owner.

Describe any innovative design elements or structural engineering involved:

Spancrete was used over the covered porch, which is above the garage.

SIPA Building Excellence Application (Page 3 of 4)

Please list any certifications the project received, such as ENERGY STAR, LEED, National Green Building Standard, WELL, Passive House, Green Globes or local green building programs. Only list certifications that are completed:

HERS Index *(required only for High Performance Category and recommended for residential projects):*

43

Blower door test results (ACH50) *(required only for High Performance Category and recommended for residential projects):*

.09

Energy use intensity in kBtu/ft² *(required only for High Performance Category and recommended for commercial projects):*

Describe the HVAC system used on the project:

95% energy efficient furnace
Well McClain boiler to heat hot water holding tank and concrete in-floor heating in basement

Describe any other energy-saving materials used in the building envelope other than SIPs. List U-values of windows used and the U or R-value of any insulation materials. *(judged only for High Performance Category)*

Spray foam on ring joist areas and all top plates. R60 blown in areas that were not SIPs

Please list any energy-efficient products or design features, such as lighting, hot water heating, appliances, passive solar *(judged only for High Performance Category):*

All lighting is LED.
Well McClain boiler to heat hot water holding tank.

Were any solar panels installed on the project? If so, indicate the size of the system *(judged only for High Performance Category):*

no

Continued

SIPA Building Excellence Application (Page 4 of 4)

Please list any sustainable materials or design features not listed above, such as recycled materials, low-VOC finishes, landscaping, etc. (judged only for High Performance Category):

Hardy concrete siding
Stone on exterior with combination of stone veneer

Any additional comments on the project:

R26
Walk out basement
10 high ceilings
In floor heat with boiler
Spancrete garage with SIPs wall on main level
40x60 toy shed, using boiler from the house to heat which has radiant heat

CHECKLIST

- My company is a SIPA member. Panels for this project were manufactured by a SIPA member.
- I have answered ALL the questions completely
- I have enclosed the two required electronic images of the completed project meeting the requirements stated in the SIPA Building Excellence Awards guidelines

PLEASE CONFIRM: I have read and understand the rules for this competition. This entry is structural insulated panel construction as defined in the SIPA Building Excellence Awards guidelines. I understand by making this submission that my pictures will be used by the Structural Insulated Panel Association (SIPA) to promote the use of structural insulated panels. I hereby give permission to SIPA to use the enclosed pictures for any use they see fit in that endeavor. I understand that where possible, SIPA will give credit for pictures used to my company as listed above.

Signature:

Date:

1/18/22

Entries that do not contain all required materials or are received after **January 12, 2022** will not be considered Complete application and submit electronically to info@sips.org

Or send hard copy applications to SIPA office: P.O. Box 39848, Ft. Lauderdale, FL 33339
