Energy Panel Structures, Inc.
PO Box 238
102 E Industrial Park
Graettinger, IA 51342

Dear Sirs:

This letter is to give you our impression of our home, an EPS home, built by LASCO Construction Services.

My wife and I have been living in our home for just over 2 months. Consequently, we have not had time to identify annual energy costs. However, we have found that this home, at approximately 3,800 square feet, is heating for about the same cost as our previous home, which was about 1,900 square feet.

As we watched the home being built, and after we moved in, we have appreciated the quality of the construction of the home. We find that outside noise does not come through the walls. And, the panel walls certainly have made it more convenient to decorate, and not need to search for studs.

Also, we have enjoyed the evenness of temperature throughout the house. We do not experience any warm or cool spots as we move through the house.

All in all, we look forward to many years of enjoyment from our new home.

Sincerely,

Donald L Fatka
