Which elements of the building (floors, walls, roof) were built with structural insulated panels? What thicknesses of SIPs were used?

ALL WALLS 6" ALL ROOF PANELS 6"

Comments you would like in a news release on the specifics of this building

DESIGNED FROM GIFT TO BE LEED PLATINUM STRUCTURE
WITH AS NEAR "0" ENERGY USAGE AS POSSIBLE

OFFICIAL ENTRY RULES

Checklist

My company is a SIPA member. Panels for this project were both manufactured and installed by a SIPA member.

I've enclosed both this checklist and the official entry form, and have answered ALL questions completely.

I've enclosed the two required 8" x 10" photographs or electronic images as defined in the SIPA Building Excellence Awards guidelines

Optional

I've enclosed photographs that display different stages of the building project

I've enclosed a floor plan drawing (no larger than 17" x 22" in size).

I've enclosed a letter from the building owner regarding the building project

I've enclosed a list of local and/or area publications (name and full contact information) for press release production

PLEASE CONFIRM

I have read and understand the rules for this competition. This entry is structural insulated panel construction as defined in the *SIPA Building Excellence Awards* contest rules and fulfills all requirements outlined in these contest rules.

I hereby submit my entry to the SIPA Building Excellence Awards. I understand by making this submission that my pictures will be used by the Structural Insulated Panel Association (SIPA) to promote the use of structural insulated panels. I hereby give permission to SIPA to use the enclosed pictures for any use they see fit in that endeavor. I understand that where possible, SIPA will give credit for pictures used to my company as listed above.

Dear Bob and Chris,

Congratulations! Your project at 7150 Donovan Road has achieved the Platinum rating in the LEED for Homes program! The first Platinum project in Michigan!

We have been very pleased to work with you on this terrific project. Your efforts have been a great example to others who are interested in the program and to those who are in the program, working toward completion.

We want to showcase your project on our website. The new site is supposed to be operational in mid-December.

I am enclosing your certificates. One is for you and one for the home owner. Please be sure to let us know when you begin the next project and if you need anything more from us.

Sincerely,

A handwritten signature in dark ink, appearing to read "Jeannine".

Re: Home Certified at:
7150 Donovan Rd.
Dexter, MI

Dear new LEED for Homes owner,

On behalf of the board of directors, the members of the U.S. Green Building Council, and the LEED for Homes Committee, I would like to congratulate you on your new LEED-rated home! The U.S. Green Building Council is proud to recognize the efforts and accomplishments of your homebuilder and project team by awarding the Leadership in Energy and Environmental Design (LEED®) Certification for Homes to your home located at 7150 Donovan Rd., Dexter, MI. Your LEED home has undergone third-party inspection and performance testing, and it is certified to be higher-performing than conventional homes. Your home's final LEED rating corresponds to the LEED for Homes pilot "LEED Platinum" certification level.

In honor of this achievement, we are pleased to present you with the enclosed certificate. Your home has earned this recognition for excellence in residential construction and a place among the finest measured green homes.

Your home has many high performance features built into it that may provide improved health, safety, comfort, and lower operating costs. LEED-rated homes benefit residents directly because the LEED Green Building Rating System™ incorporates 10 mandatory measures related to occupant health and well-being. In addition, the mandatory energy-related measures ensure at least 20-30% energy savings (relative to the national energy code). Additional energy measures can result in 30-70% reductions in energy costs. Your LEED home is also more environmentally friendly, more durable, less polluting, and makes substantially better use of resources. Moreover, these features of your LEED home may increase its value.

Please contact your builder or LEED for Homes Provider if you have any questions on the maintenance of your new home's features. For more information on LEED for Homes, you can visit our Web site at www.usgbc.org/leed/homes.

Along with the rest of the USGBC and LEED for Homes team, I congratulate you again

Sincerely,

A handwritten signature in black ink, appearing to be "R." with a stylized flourish.
