PROJECT INFORMATION

Project Name:	Camp Ronald McDonald for Good Times		
Address:	56400 Apple Canyon Rd		
City:	Mountain Center	State:	CA Zip: 92561
Date completed:	October 2012		
Total cost of project (exclusive of land):			
Dimensions of building (all floors of multi-story building):	Structures completed: 5 cabins, 1 program Shelter: 12,670 sq. ft.		
	5 cabins: each cabin is 1,210 sq ft that can accommodate 12 people each		
	Program Shelter: 950 sq ft activity cabin that can host 12-40 people for yr round meetings, classes & activities		
Asking price/purchase price (Affordable Housing only):			
Total sq. ft. of conditioned space:	12,670 sq. ft.		

BUILT BY (if different than applicant)

Company Name:	The Hale Corporation		
Contact Name:	Jr Van Dijs	Phone:	626.358.4523
Address:	513 S. Myrtle Ave Ste A		
City:	Monrovia	State:	CA Zip: 91016

PANELS MANUFACTURED BY (members only)

Company Name:	Premier SIPS by Insulfoam

Application (Page 2 of 4)

DESIGNED BY (if different than applicant – SIPA will only recognize members)

Company Name: Davy Architecture

Contact Name: Melina Aluwi Phone: 619.238.3811

Address: 811 Tenth Ave

City: San Diego State: CA Zip: 92101

Please answer each question with as much detail as possible to help in the judging process.
Attach additional sheets if necessary.

Describe the end use of the building: Camp Ronald McDonald for Good Times is a camp specifically designed for children with cancer and their families. The project was designed in 2 phases to allow the camp to operate simultaneously during construction.

How did SIP construction help you get this job? Goal was to maintain a energy efficient constant comfort level due to the extreme temperatures changes through out the year. By utilizing both Premier SIP walls & roof, this project was able to obtain a tight building envelope to reach energy efficient and indoor quality comfort. Due to the fact that the children that attend these camps have serious health issues, indoor quality comfort is the upmost important.

SIP wall thickness and core material:

SIP roof thickness and core material:

Describe the benefits of using SIPs on this project. Did SIPs help save time, labor, construction costs, or energy?
Tight building envelope for energy efficiency and indoor air quality for the health of the cancer campers.

Describe any innovative design elements or structural engineering involved:

Application (Page 3 of 4)

Please list any certifications the project received, such as ENERGY STAR, LEED, National Green Building Standard, or local green building programs. Only list certifications that are completed:

HERS Index (residential projects):

Blower door test results (ACH50) (residential projects):

Energy use intensity in kBtu/ft2 (commercial projects):

Describe the HVAC system used on the project:

Describe any other energy-saving materials used in the building envelope other than SIPs. List U-values of windows used and the R-value of any insulation materials.

Please list any energy-efficient products or design features, such as lighting, hot water heating, appliances, passive solar:

Orientation of structures in relation with the natural environment and use of low maintenance materials

Were any solar panels installed on the project? If so, indicate the size of the system:

Application (Page 4 of 4)

Please list any sustainable materials or design features not listed above, such as recycled materials, low-VOC finishes, landscaping, etc.:

Any additional comments on the project:

Main Concern while designing this project: Maintaining a visual connection to the existing camp ground, existing structures, natural environment and maintaining a hierarchy within the cabin clusters. Maintaining a energy efficient constant comfort level due to the extreme temperatures changes though out the year. Natural run off and drainage paths. Challenging soil conditions. Accessible paths of travel with respect to the natural features, run off and topography and minimal area to be used within the cabins to serve multiple families simultaneously.

CHECKLIST

- ☐ My company is a SIPA member. Panels for this project were manufactured by a SIPA member.
- ☐ I have answered ALL the questions completely
- ☐ I have enclosed the two required electronic images of the completed project meeting the requirements stated in the SIPA Building Excellence Awards guidelines
- ☐ I have indicated the HERS Index as determined by a RESNET certified home energy rater (residential projects)

PLEASE CONFIRM: I have read and understand the rules for this competition. This entry is structural insulated panel construction as defined in the SIPA Building Excellence Awards guidelines. I understand by making this submission that my pictures will be used by the Structural Insulated Panel Association (SIPA) to promote the use of structural insulated panels. I hereby give permission to SIPA to use the enclosed pictures for any use they see fit in that endeavor. I understand that where possible, SIPA will give credit for pictures used to my company as listed above.

Signature: Rachel Wood

Date: 3.17.13

Entries that do not contain all required materials or are received after **March 18, 2013** will not be considered

Complete application and submit electronically to info@schwindcommunications.com

Or send hard copy applications to SIPA office:
