

2019 SIPA Building Excellence Awards

Official Entry Form

APPLICATION DEADLINE: **January 11, 2019**

The Structural Insulated Panel Association (SIPA) is hosting the seventeenth annual Building Excellence Awards to recognize association members that build exemplary projects using structural insulated panels (SIPs). The competition allows SIPA members to showcase their best work while demonstrating the design flexibility, sustainability and energy efficiency possible with SIP construction.

**Structural Insulated
Panel Association**

**SelectSIPs
EXPO**  **2019**
A Better Way to Build

MARCH 4 – 6 / PHOENIX, ARIZONA

Winning entries will be showcased at the 2019 SIPA Annual Meeting and SelectSIPs EXPO.

Homes and commercial buildings completed between January 1, 2018 and December 31, 2018 are eligible.

Award Categories:

- High Performance (*any size or use category - judged only on special High Performance features or certifications*)
- Single Family 'Small House' under 900 sq. ft.
- Single Family Homes over 3,000 sq. ft.
- Single Family Homes under 3,000 sq. ft.
- Multifamily
- Agricultural
- Commercial/Industrial/Institutional Buildings under 10,000 sq. ft.
- Commercial/Industrial/Institutional Buildings over 10,000 sq. ft.
- Renovations (*residential or commercial, includes additions and retrofit insulated panels*)
- Affordable Housing (*excludes multifamily, home ownership cost must be at or below 30% of median income for location*)

Who is Eligible?

- The submitting company must be a current SIPA member in good standing
- Structural insulated panels must be used on a minimum of 50% of the building envelope, determined by square footage of exterior walls and roof
- The SIPs used on the project must be provided by a SIPA member manufacturer
- Installers, designers or other parties involved in the project who are not SIPA members will not be recognized in awards materials. However, builders or architects may apply for membership with their entry, but must be full members in good standing prior to the closing date for the entry to receive recognition.
- Project must be completed between January 1, 2018 and December 31, 2018

Winning Entries

- One winner will be chosen from each category. From the category winners, an Overall Competition Winner and a Runner-Up will be named.
- Judges may hand out Honorable Mentions at their discretion
- Winners will be recognized at the 2019 SIPA SelectSIPs EXPO (Annual Meeting) in Phoenix, Arizona, March 4-6, 2019.
- SIPA will promote the winning entries on the SIPA website and issue a press release to outside media

Guidelines

- Member companies may make multiple entries, but a separate entry form must be completed for each entry (except for same project also submitted to High Performance category)
- SIPA has the right to use the photos to promote SIPs to the construction industry. All entries will be displayed on the SIPA website.
- The deadline for entries is January 11, 2019. All entries must be received at the SIPA office on or before that date.

The following information and documentation is REQUIRED. Entries without the required items will not be considered.

- Completed and signed application
- A minimum of two photos showing different views of the completed project
- Photographs must be submitted in digital form and be at least 2400 x 3000 pixels, or 8" x 10" at 300 dpi
- Residential projects are encouraged to have a HERS Index calculated by a RESNET certified home energy rater. High Performance category projects must present a HERS Index with blower door data. Commercial High Performance projects must provide other documentation of energy efficiency.

Additional documentation is not required but is highly recommended to give the judges a clear picture of the project's overall design, sustainability, systems integration, and energy efficiency.

- Additional photos showing the construction process and SIP installation
- Documentation of energy efficiency, such as a HERS report, blower door test results, utility bill data, or infrared thermography
- A thorough description of energy-efficient technologies other than SIPs, as well as other innovative or sustainable features
- Comments from the building owners regarding their satisfaction with the building
- A floor plan of the project. A single page line drawing no larger than 17" x 22" in size is sufficient. Please do not send full blueprints.

Judging Criteria

Each entry will be judged on the following criteria:

- Design and structural engineering innovation
- Creative use of SIP construction
- Environmental sustainability

New High Performance Category criteria:

- Projects can compete both here and in specific building type category
- Only features pertaining to eco-efficiency, health, resilience, and renewable energy are considered here
- Energy efficiency (quantified by HERS Index, blower door and other data)

PARTICIPANT INFORMATION

Company Name: Enercept

Contact Name: Charlie Ewalt, Roberta Bartel, Mandy Dudley

Address: 3100 9th Ave SE

City: Watertown State: SD Zip: 57201

Phone: 605-882-2222

Email: enercept@enercept.com Website: enercept.com

PROJECT INFORMATION

Project Name: Stolhand Farmhouse Addition

Address: 3613 W. Oakland

City: Ponca City State: OK Zip: 74601

Date completed: Spring 2018

Total cost of project (exclusive of land): Information not shared by owner

Dimensions of building (all floors of multi-story building):

Dimensions for new living area: 54 x 48

Asking price/purchase price (Affordable Housing only):

n/a

Total sq. ft. of conditioned space:

Addition: 2,592 sq. ft., existing farmhouse: 1,150 sq. ft. = 3,742 sq. ft.

BUILT BY (if different than applicant)

Company Name: Backside of NoWhere, LLC

Contact Name: Bob Evans Phone: 405-659-0976

Address: PO Box 241

City: Prague State: OK Zip: 74864

PANELS MANUFACTURED BY (SIPA members only)

Company Name: Enercept

Continued

SIPA Building Excellence Application (Page 2 of 4)

DESIGNED BY (if different than applicant – SIPA will only recognize members)

Company Name:

Contact Name: Darrell Stolhand (homeowner)

Phone: 580-761-5170

Address: 3613 W Oakland

City: Ponca City

State: OK

Zip: 74601

Please answer each question with as much detail as possible to help in the judging process.

Attach additional sheets if necessary.

Describe the end use of the building:

The Stolhand Farmhouse Addition more than doubled the living space to an existing farm home.

The new area enhanced the modest farmhouse by adding a great room, dining room, kitchen, master suite and storage.

How did SIP construction help you get this job?

The owner, is also the owner of an HVAC business. He specifically requested SIPS to improve thermal protection on the farmhouse (SIP roof panels were installed over the existing roof) and for his new addition. SIPS also provided a cohesive design to the add-on, and the ability to span 20+ feet without additional framing.

SIP wall thickness and core material: 6" walls with solid EPS insulating core

SIP roof thickness and core material: 10" roof with solid EPS insulating core

Describe the benefits of using SIPs on this project. Did SIPs help save time, labor, construction costs, or energy?

The builder, Bob Evans, said that using SIPs on this project saved him roughly 35 days (and numerous hours) of construction time spent on this project.

The owners sold their previous residence earlier than expected, and had to move into the small original farm house during construction. The ability to frame the addition quickly was very important.

Describe any innovative design elements or structural engineering involved:

The stem wall foundation on new construction utilized SIP basement panels to maintain thermals in the crawl space, this was also beneficial in making the floor surface more comfortable.

The basement panels also allow for easy access to plumbing and other utility fixtures.

SIPA Building Excellence Application (Page 3 of 4)

Please list any certifications the project received, such as ENERGY STAR, LEED, National Green Building Standard, WELL, Passive House, Green Globes or local green building programs. Only list certifications that are completed:

n/a

HERS Index (required only for High Performance Category and recommended for residential projects):

n/a

Blower door test results (ACH50) (required only for High Performance Category and recommended for residential projects):

n/a

Energy use intensity in kBtu/ft² (required only for High Performance Category and recommended for commercial projects):

n/a

Describe the HVAC system used on the project:

The HVAC system is a Carrier Greenspeed variable capacity hybrid heat pump. HP SEER is 19 with a HSPF 13. The Carrier furnace is a 98.5% modulating gas furnace. Both the heating and cooling equipment modulate the capacity's to match the current home demand requirements. The home air quality is achieved through a Carrier Infinity Air Purifier which has a MERV 15 filter and kills air borne viruses, bacteria and mold spores. The system controller is an Infinity WIFI thermostat that completely integrates temperature, humidity and ventilation as well as tracking energy cost.

Describe any other energy-saving materials used in the building envelope other than SIPs. List U-values of windows used and the U or R-value of any insulation materials. (judged only for High Performance Category)

n/a

Please list any energy-efficient products or design features, such as lighting, hot water heating, appliances, passive solar (judged only for High Performance Category):

The clerestory windows provide abundant natural light in the new kitchen, dining and great room. LED lighting was exclusively installed in the addition and replaced incandescent bulbs in the existing home. New, energy-efficient appliances were installed in the kitchen.

Were any solar panels installed on the project? If so, indicate the size of the system (judged only for High Performance Category):

No

SIPA Building Excellence Application (Page 4 of 4)

Please list any sustainable materials or design features not listed above, such as recycled materials, low-VOC finishes, landscaping, etc. *(judged only for High Performance Category):*

n/a

Any additional comments on the project:

The design included 12x12 aged cedar timber frames in the kitchen, dining and great rooms. Concrete log siding and natural stone finish the exterior. The owners absolutely love their new home! They are happy to open their doors and share the positive building experience with anyone. Mr. Stolhand also installed the HVAC system in the Oklahoma Equine Hospital (also entered in the 2019 SIPA Building Excellence Awards).

CHECKLIST

- ☒ My company is a SIPA member. Panels for this project were manufactured by a SIPA member.
- ☒ I have answered ALL the questions completely
- ☒ I have enclosed the two required electronic images of the completed project meeting the requirements stated in the SIPA Building Excellence Awards guidelines

PLEASE CONFIRM: I have read and understand the rules for this competition. This entry is structural insulated panel construction as defined in the SIPA Building Excellence Awards guidelines. I understand by making this submission that my pictures will be used by the Structural Insulated Panel Association (SIPA) to promote the use of structural insulated panels. I hereby give permission to SIPA to use the enclosed pictures for any use they see fit in that endeavor. I understand that where possible, SIPA will give credit for pictures used to my company as listed above.

Signature: _____

Date: 1-16-2019

Entries that do not contain all required materials or are received after **January 11, 2019** will not be considered

Complete application and submit electronically to info@sips.org

Or send hard copy applications to SIPA office: P.O. Box 39848, Ft. Lauderdale, FL 33339
