PANEL COMPANY, LLC.

The Hudson Passive Project

After receiving a 5+ star Energy Star rating, a record breaking .0149 blower door test, certification as the 1st Passive house in NY by PHIUS, Builder Magazine's Merit award & favorite Passive house, Interior Design's Best of 2011 "Best Green Building" Award as well as being published online or in print in over 30+ publications, what's left for the Hudson Passive Project? Timberline Panel Company (TPC) & Dennis Wedlick Architect (DWA) are aspiring for a SIPA Building Excellence Award!

Since the start of this project some 4 or 5 years ago to seeing the project rise from the drawing board to completion on site with the help of Bill Stratton Builders, Dennis Wedlick has been a tireless promoter of everything SIP. An engaging speaker, Dennis has traveled the country promoting this project and sustainable / cost effective passive house construction in general while always keying in on the value of using SIPs to create these structures.

Dennis will be speaking once again this May 18th in Washington, DC, as a lecturer on passive house design & SIPs integration at the AIA 2012 National Convention. As an industry spokesman we could not have found a better partner ... one who understands the value of SIPs & one who has the influence and drive to bring the message to the masses.

This Spring, TPC, DWA, NYSERDA, The Levy Partnership, Engineering Ventures, OPCO, BASF & a host of other partners will begin construction on yet another Passive house in the beautiful Hudson Valley in Upstate, NY. With the interest garnered in the initial effort and a 2nd home already in the works we are optimistic this building system will become a standard that all homes will be measured against.
