

19th Annual Building Excellence Awards

Comments from the building owners regarding their satisfaction with the building:

"Once we got over the initial hiccups of working with the new to us building system, the SIP panels went together very well for us.

Another builder on site was blown away by how fast our team closed in the duplexes and how superior the end result was.

We certainly don't disagree with their observations. We are very happy with the SIPs construction and the end product."
